Scholarly Interests

My current research focus is on animal reproduction for development of assisted reproductive technologies, such as *in vitro* maturation, *in vitro* fertilization, embryo culture, embryo transfer, estrous synchronization, artificial insemination and sperm cryopreservation, which have been using successfully in to make genetic improvement of yak husbandry etc.

Ongoing research projects

1. Isolation, culture and cryopreservation of spermatogonial stem cell of yak (As CoPI).
2. Effect of season on freezability and biochemical profile of yak semen (As CoPI).
3. Ex-situ conservation of yak germplasm (As CoPI).
