

**workshop
on
Prospects of commercialization
of yak products**

February 14-15, 2020

Organised by:
Institute Technology Management Unit

**ICAR-National Research Centre on Yak
Dirang-790101, West Kameng District
Arunachal Pradesh**

VENUE
**ICAR-National Research Centre on Yak,
Dirang, West Kameng District, Arunachal Pradesh**

The Institute Technology Management Unit under National Agricultural Innovation Fund is a facilitating and supporting unit of ICAR-National Research Centre on Yak, Dirang, Arunachal Pradesh to identify the emerging technologies for their commercialization. It also manages the IP portfolios of the Institute that includes IPR management, technology licensing and developing public-private partnership. Therefore, it acts as an interface between Research & Development, knowledge revolution, entrepreneurs and stakeholders.

The dissemination of Institute technologies in partnership with public and private sectors is based on the principles of joint IPR ownerships and pre-decided licensing rights on mutually agreed terms. In this context, the most common concerns of the scientists, research scholars, innovators, stakeholders, entrepreneurs are how to protect their innovation? How to commercialize it and how to translate an innovation into a viable technology? We seek to answer these questions through the scheduled two-day's workshop on "Prospects of Commercialization of Yak Products" on February 14-15, 2020 at ICAR-NRC on Yak Dirang, West Kameng District, Arunachal Pradesh, where expert on commercialization of technology and Intellectual Property Rights will deliver their invited talks on various topics. The key purpose of this workshop is to create awareness amongst participants about the various issues of Technology commercialization and Intellectual Property Protection. So, we welcome you to be part of this two days workshop.
